Fork-Painted Feathers

Paint a peacock tail using a fork | Ages 4-8

What you need

- A plastic fork
- Paint in blue, green and gold
- Paper, and an apron or an old shirt

How to do it

1. Dip the back of the fork into the paint.
2. Press it onto the paper and lift straight up. That is one feather!
3. Fan the feathers around in a half circle to make a tail.
4. Add a body and a little crest, and your peacock is finished.

Practise here first

The faint feathers show you the shape to aim for
